

# 多托盘搬运器 Multiple Load Handlers

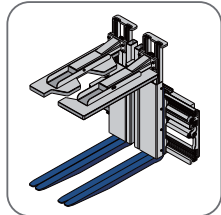

速度更快，视野更佳，进一步减少破损。  
More Speed. More Visibility. Less Damage.

**单双托盘叉**  
FDS型-可同时搬运1-2个托盘  
Single-Double Pallet Handler  
Model FDS • 1-2 Pallets

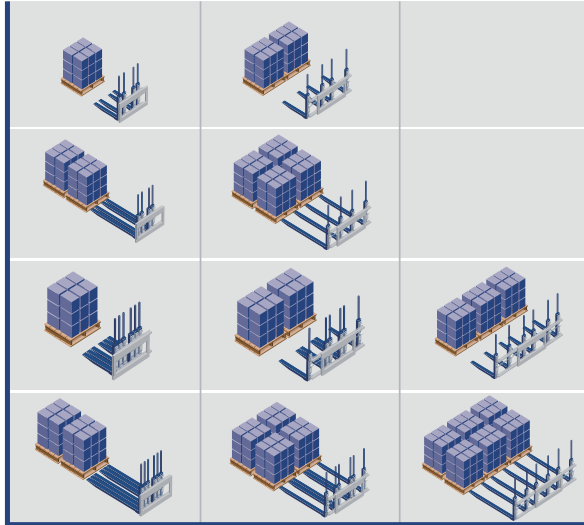

带货物稳定器的单双托盘叉  
适合搬运单层堆垛货物  
Single-Double with Load Stabilizer for single high stacks

**单双三托盘叉**  
FTS型-可同时搬运1、2或3个托盘  
Single-Double-Triple Pallet Handler  
Model FTS • 1-2-3 Pallets

带货物压紧器的单双托盘叉  
适合搬运双层堆垛货物  
Single-Double with Load Hold-Down for double high stacks

**单双三托盘叉(货叉加长型)**  
FZS型-可同时搬运2、4或6个托盘  
Single-Double-Triple Long Forks Pallet Handler Model FZS • 2-4-6 Pallets

无论何种货物，我们均能提供最佳搬运解决方案。  
Whatever the application, we can handle it.

无论是货车装货，托盘运输，货物进仓还是货物码垛，卡斯卡特多托盘搬运器都能用更短的时间搬运更多的货物。这些高度多功能性的属具可以同时搬运两个或三个托盘，而这并不妨碍属具只搬运一个托盘的能力。为了实现快速高效地物料搬运，请选择卡斯卡特。

Whether loading a truck, transporting pallets, storing in a warehouse or staging products, Cascade Multiple Load Handlers move more loads in less time. These highly versatile attachments allow you to achieve the productivity games of double or triple load handling without sacrificing the ability to handle single pallets. For fast and efficient material handling, choose Cascade.

卡斯卡特多托盘叉可帮您在实际工作环境中更便捷地作业，满足了您快速、低破损的货物搬运需求。您既可叉持一个托盘，也可以通过液压控制来分开货叉，并排夹持多个托盘。  
Cascade Multiple Load Handlers are engineered to help you perform in real working conditions, delivering what you need to move more loads faster while minimizing damage. Handle a single pallet, or spread the forks hydraulically to lift, carry and sideshift multiple pallets side by side.

#### 更灵活

- 多种型式的挡货架可满足不同的货物作业要求。
- 型号规格齐全，满足从1-6个托盘的作业需求。
- 可选件包括多种长度的货叉和压板机构。

#### 维护保养更便捷

- 易于拆装的液压油缸便于维护保养。
- 货叉可互换，轮换于不同位置使用，延长了使用寿命。

#### 更长的使用寿命

- 我们产品的耐久性测试时间超过行业标准的2.5倍——耐久性将会随着时间的推移转化为产品的巨大价值。
- 全长、全包覆式UHMW滑动支承提供最大强度的负载支撑，并降低滑动支承表面的磨损。
- 套筒式内侧货叉可优化强度并展现出更好的货叉运动特性。
- 降低维护成本。

#### More flexibility

- Load backrest available in different configurations for handling different kinds of loads.
- Full line of Multiple Load Handlers can handle from one to six loads.
- Additional options include various fork lengths and load stabilizers.

#### Faster service

- Easy-to-service hydraulic cylinders enable quick servicing.
- Interchangeable forks can be rotated for increased life.

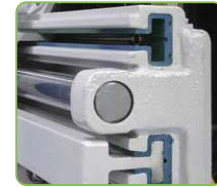

#### Longer service life

- In tests, our product lasted 2.5x longer than the previous industry standard – over time, that level of durability translates into a great value.
- Full-length, fully enclosed UHMW bearings provide maximum support, reducing wear on bearing surface.
- Pin mounted inner forks for optimal strength and better fork movement.
- Low cost service.

明智的选择：更快的货物搬运速度，最低的破损率并保持良好的竞争力。  
The clear choice: Move more loads faster, minimize damage and stay competitive.

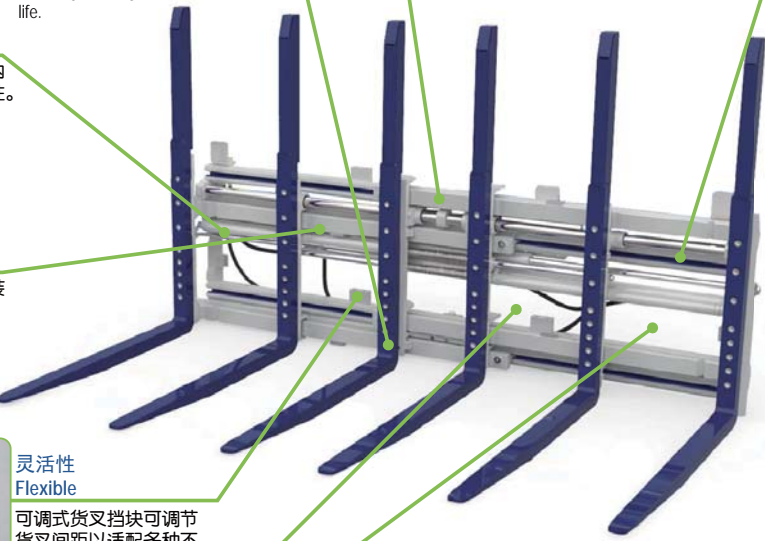

#### 坚固性 Sturdy

焊接型钢结构框架提升了强度和可靠性，降低了货物偏斜度。  
Welded steel frame for increased strength, reliability and reduced load deflection.

#### 耐用性 Durable

全长、全附着型UHMW滑动支承，使用寿命更长。  
Full-length, fully enclosed UHMW bearings for longer life.

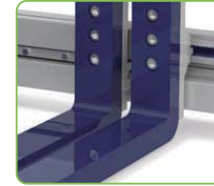

#### 安全性 Secure

坚固的内货叉套筒式挂装结构增强了货叉稳定性。  
Rigid inner fork mounting for increased fork stability.

#### 灵活性 Flexible

可调式货叉挡块可调节货叉间距以适应多种不同尺寸的托盘。  
Adjustable fork stop blocks to fit different pallet sizes.

#### 持久性 Lasting

螺栓紧固式货叉可互换，便于维护保养，可轮换于不同位置使用，延长了使用寿命。  
Bolt-on interchangeable forks for easy servicing, rotating and increased fork life.

#### 流畅性 Fluid

内货叉的弹性机构确保内货叉按顺序动作的流畅性。  
Inner fork spring mechanism to provide smooth inner fork sequencing.

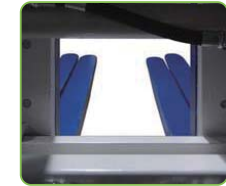

#### 视野极佳 Visibly Superior

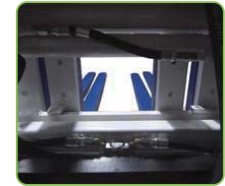

滑臂之间的间距是可以调节的，这让整个属具有更好的多功能性，更优的视野，能够让驾驶员清楚看到叉尖，从而迅速叉起货物并避免破损。  
Arm bars are positioned for better functional and perceived line of sight to give drivers a clear view of the fork tips so they can approach loads quickly and avoid damage.
